InvenComm GmbH finalizes cooperation with atec innovation GmbH

Oberägeri, 15th March 2016: Ideas are the capital of the future! According to the company motto the Swiss InvenComm GmbH starts as an experienced patent commercialisation enterprise a cooperation with the German atec innovation GmbH a leading service company for technical development and production of own and external ideas.

InvenComm provides additional service to its inventors.

The implementation of the inventor's ideas in a real industrial product is an important issue for individual and corporate inventors. Here falling tasks as construction and development via the making of patterns and prototypes through to small series and series production. Tasks that are perfectly addressed at ATEC, who can support the inventors targeted with their expertise.

On the other hand ATEC can offer its clients the commercialisation of the invention via InvenComm, whether as sale of IP-rights or licensing. Moreover, an additional cash flow for commercial inventors can be generated by licensing in applications or regional markets, where the company itself is not active.

Atec innovation GmbH based in Sindelfingen provides competent partner services for efficient product development, convinces with innovative

strength, dynamics and, not least, with very good results in customer projects.

The Swiss company InvenComm GmbH is an invention and patent commercialisation company headquartered in Oberägeri/Zug; it operates worldwide and has a global network.
